DETAILED ACTION

Rejections Withdrawn

1. Claims 1-8 rejected under 35 U.S.C. 102(b) as being anticipated by Lindsey (5311689) made in the last Office Action of April 5, 2005 has been withdrawn in view of the amendment filed on August 8, 2005.
2. Claims 1-8 rejected under 35 U.S.C. 102(b) as being anticipated by Dobbins (5887899) made in the last Office Action has been withdrawn in view of the amendment.

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 3-8 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Cho (WO-95/32491).

Cho relates to a memo sheet comprising a sheet member (139) having a front side and a back side opposite to the front side, a fold line (174B) is formed on and dividing said sheet member into two parts, each part having a front face (not shown in figure-1A) and a back face (as can be seen), a first removable pressure sensitive adhesive (PSA) is provided on one of the back face of the two foldable parts, and a second removable

Art Unit: 1772

PSA is provided on the back face of the part that remains exposed when the sheet is folded. As shown in figure-1A, the first adhesive is located along line 147A (see lower $1/3^{\text{rd}}$ of the sheet) and the second adhesive is located at or under element (174) adjacent the top of the sheet. As such the second adhesive will remain exposed.

As for the two parts being cover part and hidden part, said feature is directed to future use of the sheet, specially when the sheet is in a folded form and hence, have not been given any patentable weight because said intended use feature is not found to be of positive limitation to the invention as claimed.

Similarly, other intended use phrases such as "being foldable", "when said sheet member is folded", etc. have also not been given any patentable weight.

As shown in the figure-1A, the two adhesive are located adjacent to one another, the fold line is a marked line or a scored line (of perforations), the sheet has opposite side edges extending transverse to the fold line with the fold line extending from side to side and the side line forming the cutout portions.

Further, the hidden part has a smaller area than the cover part because the hidden part constitutes about $1/3^{\text{rd}}$ of the sheet member.
